**DETAILED ACTION**

1. This office action is in response to the Amendment filed on 01/30/2009. Claims 2 and 4 are cancelled. Claims 1 and 3 are now pending.
2. The objections and rejections not addressed below are deemed withdrawn.
3. The text of those sections of Title 35, U.S. Code not included in this section can be found in a prior Office Action.

***Claim Rejections - 35 USC § 103***

5. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang ("Preparation of a porous hydroxyapatite/collagen nanocomposite using glutaraldehyde as a crosslinkage agent", Journal of Materials Science Letters 20, 2001, 1199 – 1201) in view of Lee et al. ("Characterization of UV-irradiated Dense/porous Collagen Membranes: Morphology, Enzymatic, Degradation, and Mechanical Properties", Yonsei Medical Journal, Vol. 42, No. 2, pp. 172-179, 2001).

The rejections stand as per the reasons set forth in the previous Office Action paragraph 5, incorporated herein by reference.

***Response to Arguments***

4. Applicant's arguments filed 01/30/2009 have been fully considered but they are not persuasive.
5. The previous Office Action page 3, lines 17-18 reads "optimal pore size was obtained at a freezing temperature of -70°C (Abstract)".

6. Applicants argue: “both CHANG and LEE fail to disclose ... “determining the solidification time for producing said porous body ... a relation between the freezing-environment temperature and the solidification time.”

Response: Attention is drawn to LEE Abstract and Table 1, which demonstrates the relation between freezing temperature and pore size of the collagen-based membrane materials. Lower freezing temperature will shorten the freezing time needed.

### *Conclusion*

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
